Nymi Firmware 4.11.3

Nymi's Connected Worker Platform (CWP) connects people with technology through safe, simple, and secure solutions. The Connected Worker Platform supports numerous use cases and digital systems and combines point solutions into a single offering.

The goal of the Connected Worker Platform is to simplify the connection of workers to the digital space found in modern organizations. When the barriers to secure digital work are removed, workers can focus on what they do best.

This will be a Risk Level 0 (R0) General Availability (GA) release of Nymi Band 3 Firmware.

Nymi Firmware Components

NF 4.11.3 includes the following component versions:
- Firmware version of Nymi Band 3 — 4.11.3.6

New In This Release

Fix for false taps detection by Nymi Application on newer iPad models

This release contains a fix to stabilizes the RSSI values, which should remain stable before and after authentication with fingerprint.
